MANUFACTURERS SUPPORT GOVERNOR SCOTT'S ENTERPRISE FLORIDA REFORMS

TALLAHASSEE, Fla. – The Manufacturers Association of Florida is supporting Governor Scott's proposed Enterprise Florida reforms, including the creation of the Florida Enterprise Fund.

Florida must be competitive in every way to ensure a bright future. "By establishing the Florida Enterprise Fund, Florida can robustly compete with other states for those economic development projects that have long term potential for Florida. Economic development supports job creation and job creation supports Florida families," said Nancy Stephens, Executive Director, Manufacturers Association of Florida.

In addition to the Florida Enterprise Fund, the reforms Governor Scott is proposing to the Enterprise Florida economic development program will allow for greater oversight by the Legislature and better business practices. We look forward to a revitalized state economic development program.
